-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 3, the phrase "capable of causing a crack" is not clear in scope. Does this mean that there must actually be some sort of crack for the claim to be infringed? If not, then how would one judge whether something is capable of causing a crack? In claim 23, "on order to cause a crack" is similarly unclear. Is a crack actually present (or "caused")?

In claim 2, "a freely strippable seal member" is similarly unclear. Must something actually be stripped? And if not, how would one know what is "freely strippable" and what isn't? Are there some sort of standards by which one could measure strippability? With respect to damage caused by a stripping operation perhaps? Claim 23 has a similarly unclear phrase, "for stripping off a seal." Is the seal actually stripped off?

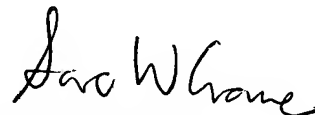

In claims 8, 9, 10, and 24, a "performance deterioration material" is recited. What is a performance deterioration material? How would one know whether a device includes such a material?

In claim 22, "in order to deteriorate a performance of the organic semiconductor as the starting device" is not clear. What is a starting device, and how would one know if its performance is deteriorated?
